

Please amend the application as follows:

In the Claims

Please cancel Claim 5. Please amend Claims 1, 9, 10, 11, 16 and 22. Amendments to the claims are indicated in the attached "Marked Up Version of Amendments" (pages i - ii).

- D
1. (Three times amended) A capsule comprising a porous membrane formed by a polyelectrolyte complex which encapsulates cells which express a cytochrome P450 gene, wherein the membrane is permeable to prodrug molecules and the cytochrome P450 gene and the cytochrome P450 expressed by the gene are retained within the capsule.

9. (Twice amended) The capsule according to Claim 1 wherein the cytochrome P450 is cytochrome 2B1.

- Sub E1
- D2
10. (Amended) A method for ablation of tumour cells, comprising contacting said tumor cells with prodrug molecules and a capsule wherein the capsule comprises a porous membrane formed by a polyelectrolyte complex which encapsulates cells which express a cytochrome P450 gene, wherein the membrane is permeable to the prodrug molecules, the cytochrome P450 gene and the cytochrome P450 expressed by the gene are retained within the capsule and the prodrug molecules are converted into active drug molecules by cytochrome P450 and thereby ablate the tumor cells.

11. (Twice amended) A method of treating a tumor comprising administering to a subject in need thereof a therapeutically effective amount of a capsule and, either simultaneously or with a time span, a prodrug which is activated by cytochrome P450, wherein the capsule comprises a porous membrane formed by a polyelectrolyte complex which encapsulates cells which express a cytochrome P450 gene, the membrane is permeable to the prodrug molecules, the cytochrome P450 gene and the cytochrome P450 expressed by the gene are
